

CONSENT TO TREATMENT – Medical Cannabis Services

Minn Skin LLC

Telehealth Informed & Privacy Consent, Treatment, Medication History, Electronic Communications, Financial Agreement

1. Informed Consent for Telehealth Services

Introduction:

Telehealth through Minn Skin LLC uses electronic communication to collect your medical history via an **asynchronous intake form**. After submission, you will receive a link to **schedule a phone visit (or video visit if indicated)** with a licensed provider for evaluation and certification.

Benefits: Convenience, reduced travel, faster scheduling for non-urgent evaluation.

Risks: Technical issues with intake submission, limited information from asynchronous intake, potential delays in visit scheduling.

Limitations: Telehealth intake alone does not substitute for in-person care. For emergencies, call 911 or seek immediate care.

2. Authorization to Administer Certification

- I authorize Minn Skin LLC to review my intake form and conduct a **scheduled phone visit (or video visit if indicated)** for medical cannabis evaluation and certification.
 - I understand telehealth is limited for urgent or complex conditions.
 - I understand the risk of incomplete evaluation due to absence of an in-person exam.
 - I agree to follow up in-person or call 911 for urgent issues.
-

3. Medication History Consent

I authorize Minn Skin LLC providers to access and review my medication history from pharmacies, pharmacy benefit managers, and health information exchanges as needed for safe certification.

4. Electronic Communication & Documentation

- Intake forms are asynchronous; scheduled phone or video visits are synchronous.
- Secure portal, email, or phone should not be used for emergencies.

- Minn Skin LLC may use AI dictation or documentation tools integrated within the HIPAA-compliant EHR (e.g., Heidi) to create accurate clinical documentation.
 - Consent can be withdrawn in writing at any time.
-

5. HIPAA & Data Privacy

- Minn Skin LLC protects your PHI under HIPAA and Minnesota law.
 - PHI is used for evaluation, certification, billing, and operations.
-

6. Financial Agreement

- Medical cannabis telehealth services are **cash-pay only**; insurance is not billed.
 - Payment is due when you schedule or complete your phone or video visit.
 - Payment is **non-refundable** once your intake has been reviewed and your visit completed.
-

7. Minor Patient Acknowledgment (if applicable)

- Parent/legal guardian consent is required for minors.
 - Parent/guardian acts as caregiver and is responsible for legal compliance with Minnesota medical cannabis rules.
-

8. Patient Responsibilities

- Submit accurate and complete intake forms.
 - Schedule and attend your **phone or video visit** for evaluation.
 - Maintain confidentiality of portal and visit communications.
 - Understand that certification is subject to state program rules; submission does not guarantee approval.
-

Acknowledgment

By signing the intake questionnaire, I confirm that I understand this consent, agree to submit my intake form, schedule a **phone or video visit**, and accept the risks, responsibilities, and financial obligations described above.
